PROFESSIONAL PROFILE

Career-changing technology professional currently undertaking a Cyber Security Technician Skills Bootcamp, with hands-on Cisco networking labs, secure device configuration, introductory Wireshark analysis and cloud security design coursework. Independently built and deployed live websites using React, Next.js and TypeScript. Brings extensive client-facing experience, business ownership, clear communication and practical problem-solving. Seeking junior IT support, application support, networking or cybersecurity opportunities.

TECHNICAL SKILLS

Networking & troubleshooting: IPv4, subnet masks, default gateways, DHCP, wired/wireless networks, Cisco router and switch configuration, ping, ipconfig.

Network security: SSH, device access controls, password protection, access banners, WPA2-PSK/AES, introductory Wireshark packet inspection.

Cloud security concepts: Microsoft Azure Firewall, Network Security Groups, Microsoft Entra ID and Intune (architecture/design coursework).

Development & tools: JavaScript, TypeScript, React, Next.js, HTML, CSS, Tailwind CSS, REST APIs, Git, GitHub, Vercel, browser developer tools.

AI content creation: Promptwise, AI video prompting and mascot animation concepts

Professional strengths: Customer support, troubleshooting, documentation, client communication, organisation and independent project delivery.

TECHNICAL PROJECTS

Secure Business Network | Cisco Packet Tracer

- Configured a simulated two-office network with Cisco routers, switches, wired/wireless clients, static IP addressing and DHCP.
- Implemented device passwords, access banners and SSH remote management; verified SSH login.
- Configured WPA2-PSK/AES wireless security, tested connectivity with ping and documented results.
- Configured email services and client accounts and tested message delivery.

Office-to-Cloud Security Design | Microsoft Azure (coursework)

- Produced a security architecture diagram proposing Azure Firewall and Network Security Groups for traffic protection and access restrictions.
- Explored Microsoft Entra ID for identity/access management and Intune for endpoint management; documented encryption concepts and control purposes.

Live Website Development | Independent projects

- Playground Pantry: built and deployed a Next.js website for a school catering company; integrated a contact form, managed environment variables and performed responsive and production troubleshooting.
- JC Coach: built and launched a coaching website using React, Next.js and Tailwind CSS.
- Used Git/GitHub and Vercel in independent development and deployment workflows.

AI-Assisted Mascot Video Creation | Playground Pantry

- Created short, child-friendly mascot animations and video concepts using AI tools. Refined prompts for movement, gestures, framing and looping.

TRAINING & EDUCATION

Cyber Security Technician Skills Bootcamp | Leep Group | Sep 2026–Present (in progress)

Cisco Networking Academy Networking Essentials coursework; guided networking labs and secure business network capstone.

Independent study: web development, Microsoft Azure, responsive design, accessibility, debugging and deployment.

PROFESSIONAL EXPERIENCE

Self-employed Online Coach| 2016–Present

- Manage client relationships, enquiries, appointments and programme delivery; adapt explanations to individual needs.
- Review client progress, solve service issues and independently manage scheduling and administration.

Owner, The Pit Gym | 2014–2016

- Founded and operated a gym, overseeing finances, daily operations, client retention and team leadership.

Earlier roles | 1996–2014

Personal training, delivery driving, installation engineering and machine operation; developed reliability, practical problem-solving and customer service skills.
