Personal profile

Career changer from personal training and business ownership into cyber security, bringing more than a decade of communication, organisation and practical problem-solving experience. Currently undertaking the Cyber Security Technician Skills Bootcamp with Leep Group, developing skills through guided networking labs, secure device configuration and introductory Wireshark work. Additional experience building and deploying live websites and working with Microsoft Azure through independent projects. Seeking an entry-level cyber security, IT support or network support role where I can contribute, build confidence and learn from experienced colleagues.

Technical and transferable skills

- Networking: IPv4 addressing, subnet masks, default gateways, DHCP, wired and wireless networks, router and switch configuration, and connectivity checks using ping and ipconfig.

- Network security: SSH remote access, device access controls, password protection, authorised-access banners and WPA2-PSK wireless security with AES in simulated networks.

- Cloud security foundations: Coursework exploring Azure Firewall, Network Security Groups, Microsoft Entra ID and Intune within an office-to-cloud security design.

- Technical tools: Cisco Packet Tracer, Cisco CLI, introductory Wireshark packet inspection, Git, GitHub, Vercel and browser developer tools.

- Web development: JavaScript, TypeScript, React, Next.js, HTML, CSS and Tailwind CSS; REST APIs, environment variables and live website deployment.

- Communication and troubleshooting: Explain information clearly, adapt to individual needs, investigate configuration issues, test results and document practical evidence.

Employment history

Self-employed Personal Trainer | 2016â Present

- Manage client enquiries, appointments, programme delivery and ongoing relationships, adapting communication to individual needs.

- Review client progress data, adjust programmes and organise administration and scheduling independently.

Owner, The Pit Gym | 2014â 2016

- Founded and managed an independent gym, overseeing daily operations, finances, client retention and team leadership.

Earlier employment | 1996â 2014

Roles in personal training, delivery driving, installation engineering and machine operation developed practical problem-solving, reliability and customer service skills.

Practical projects

Secure Business Network â Cisco Packet Tracer

Guided bootcamp capstone project in a simulated environment.

- Configured a two-office network using routers, switches, wired and wireless clients, static IP addressing and DHCP services.

- Applied router and switch access controls, including password protection, authorised-access banners and SSH remote management; verified a successful SSH login.

- Configured WPA2-PSK wireless security with AES and tested connectivity between devices and offices using ping.

- Configured email services and client accounts, tested message delivery and captured configuration and testing screenshots as project evidence.

Office-to-Cloud Security Design â Microsoft Azure

Bootcamp design coursework; architecture and security control selection.

- Developed an office-to-cloud network diagram considering Azure Firewall and Network Security Groups for network protection and access restrictions.

- Explored the roles of Microsoft Entra ID for identity and access management and Intune for device management within the proposed design.

- Considered encryption concepts and documented the purpose of security controls within the architecture.

Live Website Development

- Playground Pantry: Built and deployed a Next.js website for a school catering company. Integrated a contact form, managed environment variables and carried out production troubleshooting and responsive testing. playground-pantry.com

- JC Coach: Built and launched a coaching website using React, Next.js and Tailwind CSS to support a business.

Education and ongoing learning

Cyber Security Technician Skills Bootcamp | Leep Group
3 September 2026â Present | In progress

Practical networking and cyber security training, including Cisco Networking Academy Networking Essentials coursework and a secure business network capstone project.

Google Data Analytics Professional Certificate | Coursera
In progress

Independent technical study
Ongoing learning in web development, Microsoft Azure, responsive design, accessibility, debugging and production deployment.

Interests

Independent technology projects, strength training, powerlifting, walking and spending time with family.
