Personal profile

I am changing careers from personal training and business ownership to cyber security, bringing communication, organisation and problem-solving skills developed through more than a decade of working with clients. My interest in technology is reflected in my independent study and experience building and deploying live websites. I am currently undertaking the government-funded Cyber Security Technician Skills Bootcamp with Leep Group, developing practical skills in networking, secure device configuration and troubleshooting through Cisco Packet Tracer projects and introductory Wireshark work. I am seeking a trainee cyber security technician role where I can apply these foundations, contribute to protecting systems and continue learning from experienced colleagues.

Key skills

- **Networking:** IPv4 addressing, subnet masks, default gateways, DHCP, wired and wireless networks, router and switch configuration, and connectivity checks using ping and ipconfig.
- **Network security:** SSH remote access, device access controls, password protection, authorised-access banners and WPA2-PSK wireless security with AES in simulated networks.
- **Technical tools:** Cisco Packet Tracer, Cisco CLI, introductory Wireshark packet inspection, Git, GitHub, Vercel and browser developer tools.
- **Web development:** JavaScript, TypeScript, React, Next.js, HTML, CSS and Tailwind CSS; experience with REST APIs, environment variables and live website deployment.
- **Communication and customer service:** Explain training programmes clearly, listen to individual needs and maintain long-term client relationships.
- **Problem-solving and attention to detail:** Investigate website and network issues, check configurations, test results and document practical evidence.
- **Organisation, leadership and adaptability:** Manage business priorities independently, draw on experience leading a gym team and develop new skills through practical study.

Employment history

Self-employed Personal Trainer | 2016 - Present

- Manage client enquiries, appointments, programme delivery and ongoing customer relationships, adapting communication to individual needs.
- Review client progress data and adjust training programmes to support individual goals.
- Organise day-to-day administration and scheduling independently, balancing client needs with business responsibilities.

Owner, The Pit Gym | 2014 - 2016

- Founded and managed an independent gym, overseeing daily operations, finances, client retention and team leadership.

Earlier employment | 1996 - 2014

Roles in personal training, delivery driving, installation engineering and machine operation developed practical problem-solving, reliability and customer service skills.

Education

Cyber Security Technician Skills Bootcamp | Leep Group

3 September 2026 - Present | In progress

Practical networking and cyber security training, including Cisco Networking Academy Networking Essentials coursework and a secure business network capstone project.

Capstone project: Secure Business Network Deployment

- Configured a simulated two-office network in Cisco Packet Tracer, using routers, switches, wired and wireless clients, static IP addressing and DHCP services.
- Applied router and switch access controls, including password protection, authorised-access banners and SSH remote management; verified a successful SSH login.
- Configured WPA2-PSK wireless security with AES and tested connectivity between devices and offices using ping.
- Configured email services and client accounts, tested message delivery and captured configuration and testing screenshots as project evidence.

Google Data Analytics Professional Certificate | Coursera

In progress.

Independent web development study and practical projects

Ongoing learning in React, Next.js, TypeScript, responsive web design, accessibility, debugging and production deployment. Applied this learning to live websites:

- **Playground Pantry:** Built and deployed a Next.js website for a school catering company. Integrated a contact form, managed environment variables and carried out production troubleshooting and responsive testing. playground-pantry.com
- **JC Coach:** Built and launched a coaching website using React, Next.js and Tailwind CSS, applying web development skills to support a client-facing business. jc-coach.com

Hobbies and interests

I develop websites and explore new technical skills through independent projects. I also enjoy strength training and have a keen interest in bodybuilding shows and powerlifting competitions. Outside these interests, I enjoy walking, spending time with my family and looking after my two cats.
